

IMPROVE IRRIGATION AND MOISTURE EFFICIENCY

iQ Penetrate is a high-efficiency surfactant, reducing surface tension and increasing water infiltration into the micropore areas where roots uptake nutrients.

- **Reduces surface tension, improving water movement into compact soils and difficult to hydrate micropore space**
- **Contains 3 types of carboxylic acids that aid in solubilizing bicarbonates, alleviating sealed off surfaces and leaching salts**
- **Ideal to spray with growth regulators and products benefiting from improved contact, increasing uptake**

Pack sizes:
2 x 2.5 gal, 55 gal drum, 250 gal tote

CONTAINS NON-PLANT FOOD INGREDIENT(S)

Active Ingredients:

7.0% Carboxylic Acids
17.0% Nonionic surfactants

Inert Ingredient:

76.0% Water

All ingredients are exempt from tolerance under 40 CFR 180
