

Bermuda Grass Agronomic Growth Program

Product	Rate/Acre	Timing	Application
IQ Carbon	0.5 -1.0 lbs.	Dormancy / Semi-Dormancy	Soil Application...Water In
IQ Amino-N	0.5 lbs.		
IQ Carbon	0.5 lbs.	30 Days Prior To Green Up	Soil Application...Water In
IQ PK	0.5 gals.		
IQ Amino-N	2 lbs.	During Growing Season	Soil or Foliar Application
IQ Phos	1 lb.		
IQ Micro	1 lb.	During Growing Season	Soil or Foliar Application
IQ PK	0.5 lbs.	30 Days Prior To Dormancy	Soil or Foliar Application
IQ Carbon	1 lb.		

Simply Intelligent Growth

Agronomic Partners designs, produces and sells high efficiency plant growth and plant management solutions. More than *just* a fertilizer company, Agronomic Partners is a *solutions company* – helping you achieve higher results for your input investments..

The **IQ** line of products provide low input, high plant availability nutritional solutions for the full range of turfgrass. Environmentally responsible and economically sustainable, **IQ** products can be used as a replacement or as a complementary addition to your existing programs.

In addition to benefits to your turfgrass and your bottom line, IQ products also offer:

- Clean, easy handling solutions
- Will not corrode application equipment
- Low impurities
- Low salt
- Highly soluble

Call your Agronomic Partners representative for more information or visit our website!

**IQ**_{Carbon}

The Superior Humic Input

The carbon chains within **IQ Carbon** provide the “food” that microbes seek out within the root zone. **IQ Carbon** allows for as much as 20-50 percent lower overall Nitrogen inputs, which is not only more cost-efficient, but also reduces the risk of nutrients run-off into ground and surface water.

**IQ**_{Amino-N}

A Natural Solution For Strong Growth

IQ Amino-N supplies amino acid chelates specifically designed for application on plants. Amino acids are the basic building blocks of protein, and **IQ Amino-N** contains 18 amino acids (including nine “essential” amino acids) and organic nitrogen (derived from vegetable proteins), which can be absorbed by plants very quickly.

**IQ**_{PK}

High Energy – Low Inputs

IQ PK provides superior plant available Potassium, enhancing plant turgor, and assisting in regulating growth, while also increasing the plant’s ability to resist stress-inducing conditions. The complexing and chelation of **IQ PK** with Humic and Amino Acids assures high return with very low input rates.

**IQ**_{Phos}

Start Fast & Finish Strong

IQ Phos is the most plant-available, lowest input Phosphorus source in the industry. Input rates at only 1 - 3 lbs per acre are possible because of the Carbon-Complex Protection of the nutrient. **IQ Phos** provides not only economical benefit, but satisfies most phosphorus environmental regulations relating to pounds per acre, while still meeting or exceeding the plants’ needs.

**IQ**_{Micro}

Micro Nutrients, Maximum Impact

Zinc, Manganese, Iron, Copper and Boron are critical for robust growth, color and ultimately, plant strength. Ionic minerals, chelated and complexed to resist soil tie-up, means **IQ Micro** gives you plant-available nutrients with low inputs, low waste ... with high return on your investment.
