

# Soybean Agronomic Growth Program

## High Efficiency Program:

- Apply ***IQ Phos*** at or prior to planting – 2 lbs. per acre.
- If using a spray application, mix with 10-20 gallons of water/acre.
- For in-furrow treatment with seed, no water is needed.

- Apply 1 lb. per acre of ***IQ Set*** with traditional fertilizer, mixed with 10-20 gal. water.
- ***IQ Set*** can also be tank-mixed with any other treatment applied at this stage.

- Apply 1 lb. of ***IQ Set*** mixed with 10-20 gal. of water per acre.
- This can be mixed with traditional fertilizer or other treatments required at this stage of development.
- Can also be applied with the R3 sprays if no other sprays are scheduled.

## Post Harvest

- Apply 1 lb. of ***IQ SM***, mixed with 20 gallons of water immediately following harvest.
- This will break down field residue and return valuable nutrients to your soil profile.
- An excellent investment for your next growing season!

# Simply Intelligent Growth

Agronomic Partners designs, produces and sells high efficiency plant growth and plant management solutions. More than *just* a fertilizer company, Agronomic Partners is a *solutions company* – helping you achieve higher yields, and higher profits.

The **IQ** line of products provide low input, high plant availability nutritional solutions for the full range of agricultural crops. Environmentally responsible and economically sustainable, **IQ** products can be used as a replacement or as a complementary addition to your existing programs.

In addition to benefits to your crops and your bottom line, IQ products also offer:

- Clean, easy handling solutions
- Will not corrode application equipment
- Low impurities
- Low salt
- Highly soluble

Call your Agronomic Partners representative for more information or visit our website!

## Start Fast & Finish Strong

**IQ Phos** is the most plant-available, lowest input Phosphorus source in the industry. Input rates at only 1 - 3 lbs per acre are possible because of the Carbon-Complex Protection of the nutrient.

**IQ Phos** provides not only economical benefit, but satisfies most phosphorus environmental regulations relating to pounds per acre, while still meeting or exceeding the plants' needs.

## Get Set For Higher Yields

The unique combination of essential nutrients, sugars and Amino Acids in **IQ Set** provides plants with the nutrition necessary for more consistent maturation and increased productivity.

Insufficient levels of Amino Acids in alternative fertilizers means that much of the nutrients remain unprotected from soil tie-up. **IQ Set** contains 40% Amino Acids; enough to fully complex and chelate nutrients, ensuring nutrient protection and enhanced plant uptake.

## The First Step Toward Your Next Seeding

**IQ SM** accelerates residue breakdown, increasing nutrient availability and cycling, building organic matter, adding and increasing soil biology, and drastically reducing input costs at the next growing season.

The addition of plant available calcium in **IQ SM** reduces soil compaction and allows soil biology to thrive deeper in the soil profile which assists in proper root establishment.
